# **GRIPPS®** Screwlock Cable

# SAFETY INFORMATION

**MARNING** Before using GRIPPS<sup>®</sup> Screwlock Cables, read all provided safety information pertaining to the use of your Dropped Tool Prevention (DTP) device. FAILURE TO DO SO COULD RESULT IN INJURY OR DEATH.

The user of a DTP device bears the responsibility of reading all safety information contained herein. Keep this manual for future reference.

## Intended Use:

When used properly, GRIPPS® Screwlock Cables can prevent workplace hazards resulting from dropped tools. These may include personal injury and material damage.

GRIPPS® does not approve use of this device for any activities not described in the User Instructions. This device is not intended to be used in any recreational activity, as a personal fall-arrest device or in any other manner not described herein.

# **MARNING** Misuse of this device could result in serious injury or death.

Adhere to all manufacturer recommendations regarding the operation and maintenance of this device. For additional information, contact GRIPPS® customer support.

## Read and adhere to the following in order to ensure correct operational functionality:

- Your DTP should never be used as a personal fall-arrest device or restraint system.
- Do not use this device with tools that exceed the specified maximum load/weight.
- A DTP device used in applications that exceed the limits of operation specified by the manufacturer should be considered unsafe and should be replaced.
- Do not tether a tool over 2.5kg/5.5lbs directly to your clothing or person.
- Inspect your DTP device before each use.
- Ensure the DTP device is securely connected to a load rated tool connector or anchor point before use.
- Inspect any tool connector point before it is connected to the DTP device.
- Modification of the DTP device voids all warranties and violates manufacturer recommendations.
- Do not use a tool that cannot be connected to your DTP in the manner specified by GRIPPS®.
- It is unsafe to extend the length of the DTP product by any means.
- Do not use this product if it will create an unsafe working environment.
- Use extra precaution around moving machinery, moving parts, electrical hazards, extreme temperatures, chemical hazards, or combustion hazards.
- Avoid contact between the Screwlock Cable and rough or sharp edges.
- All connected tools and equipment, including connection points, must be compatible for use with this DTP device. Always wear appropriate personal protective equipment.

- If a tether has arrested a dropped tool or object, it should be taken out of service and replaced.
- All procedures shown in this instruction are for GRIPPS® Screwlock Cable products only.

## **GENERAL USE AND CARE**

GRIPPS® Screwlock Cables are designed to create a secure tool connection point by simply threading the Screwlock Cable through an existing hang-hole/slot in a tool. To create a permanent, load rated connection point on your tool, add a drop of thread-locking compound before screwing shut.

### Recommended Use of GRIPPS® Screwlock Cable:

- 1. Use the H01030 & H01031 Screwlock Cable for tools that weigh up to 1.0kg/2.0lbs.
- 2. Use the H01032 & H01033 Screwlock Cable for tools that weigh up to 2.0kg/4.4lbs.
- Only attach Screwlock Cable to an existing, engineered hang-3. hole/slot as per the CAT/SHORE tool tethering methodology.
- 4. Do not attempt to create your own hole. If a tool does not have an existing hang-hole/slot then use a GRIPPS® Tool Catch and V-Gripp Tape.

#### Before Use:

Thoroughly inspect your GRIPPS® DTP device before each use. Do not use any component that presents deformities or deterioration.

### Screwlock Cable Usage Instructions:

## To connect to a tool with existing hang-hole/slot

1. Thread Screwlock Cable through hole in the tool.

2. Screw the two ends together, ensuring they are screwed fully in and the threads haven't crossed.

To create a permanent tool connection point 1. Thread Screwlock Cable through hole in the tool.

2. Squeeze a drop of thread-locking compound onto to thread.

3. Screw the two ends together, ensuring they are screwed fully in and the threads haven't crossed.

## After Use Care:

Clean and inspect the Screwlock Cable and any connected tethers. For tougher stains, use warm water and a mild soap or detergent. Do not use again until dry.

Store in a clean and dry environment. Proper care will help to ensure that it will operate effectively and extend its service.
